

KiBot variants example
Not a real life board

- H1 MountingHole
- H2 MountingHole
- H3 MountingHole
- H4 MountingHole
- FID1 Fiducial
- FID2 Fiducial
- FID3 Fiducial
- FID4 Fiducial

This logo has a REF starting with #
Won't be passed to the PCB

An example of KiBot variants

Just a copy of the original circuit, but not as ugly
